PREFATORY NOTE.

Numbers prefixed by an asterisk refer to periodicals which have already appeared in the Bibliography (1930), whilst numbers followed by a capital letter refer to periodicals cited here for the first time. Thus, on page 3, under *94 are listed supplementary titles for periodical No. 94, whereas 94A and 94B are new periodicals falling between 94 and 95 in the original Bibliography.

SUBJECT INDEX TO TITLES.

This index is based upon the subject matter as revealed in the titles only, as printed in the Bibliography, and is arranged in four groups headed respectively: GENERAL, PARASITES, PARASITIC DISEASES and HOSTS, under each of which the keywords are in A-Z order. The fourth group contains hosts other than man, since man is rarely mentioned as host in titles of medical papers, and cannot always be inferred with certainty. Titles on systematics, life-histories and bionomics are indexed under "Parasites," and those on pathology, therapeutics, prophylaxis and related subjects under "Parasitic Diseases," without cross-references. An index of this type is necessarily not exhaustive, since the titles often give little indication of the scope of the actual paper.
